### How Rooms Are Rented in Mexico.

Strangers sometimes mildly wonder what newspapers or sheets of blank paper are tied on the windows or balconies of certain houses for. And the next moment Tommy was being pursued by an angry sire with a hard hairbrush.—*Chicago News.*

### The Eyes in Writing.

Many persons who think their sight perfect have a greater visual power in one eye than in the other. With regard to the respective power of the right and left eyes, a well known optician finds that a person occupied in writing all day has, as a rule, stronger vision in the left. Writing with the right hand and his left arm resting on the table, his left eye is nearer his work, and its vision is more concentrated. This expert says that our race will never become so shortsighted as the German while football, cricket, tennis, hockey, etc., are encouraged in our public schools.
